YOU OWE IT TO YOUR COMPANY

When fire strikes, it's not just the premises it destroys, it will also engulf all the essential company paperwork stored inside them.

Unfortunately, the failure to preserve these vital records, only too often, destroys the company itself! In spite of the computer revolution, vast amounts of important data and records are still held on paper.

With an increase in fire hazards from electrical equipment, insurance statistics indicate that as many as 35% of companies will cease to exist within the first year after a major fire. It is therefore essential for survival that all your records are protected. From debtor records to payroll and pension fund data, from customer orders to product designs, all valuable and legal documents, deeds and contracts require protection. Don't forget by law you are required to protect hazardous chemicals and paints from theft and fire.

The answer to all of these problems is the Phoenix Firechief FS1610 Series.

FIRE RESISTANT SECURITY CUPBOARDS

The combination of state of the art insulation materials and innovative design has led to the development of the Phoenix Firechief FS1610 Series.

Available in three sizes, our cupboards are robustly constructed with a 50mm fire gap between the inner and outer layers. This gap is filled with our specially developed system of multi-layered insulation materials to ensure the survival of your documentation.

All models are equipped with height adjustable shelves with optional lateral rails available.

● Dimensions stated as:

- A External height x width x depth
- B Internal height x width x depth
- C Door swing
- D Weight
- E Capacity
- F No of shelves

● Firechief FS1611K/FS1611E
